APRIL 19 2021

Dear Sir/Madam

RE: APPLICATION FOR SYSTEM ANALYSIS DATABASE AND ERP ADMINISTRATION POSITION

I have the skills and potential to fill the Graphics and Designer position that you advertised for on your Facebook page.

I will receive my professional Course in Website Development Programming from Harvard University before mid this year where am able to learn MYSQL, MongoDB Adobe XD, HTML, CSS, JavaScript and Python programming.

I have a Diploma Course in Computer Science from National Youth Service Engineering Institute and therefore believe I am the one you are looking for.

I also have a professional course CCNA from Kenya College of Accounts(KCA) where I learnt about computer networks and infrastructure on CISCO devices.

As a young experienced gentleman I have contributed a lot on user support at Kenya Pipeline Company during my attachment period where I was assigned duties of network installation, hardware and software configuration, user software support, operating system and application (re)installation and (re)configuration and logging of user problems in the helpdesk system and recommended for the good work.

I have also worked at Laugh Industry as audio/visual engineer where my duties were playing contents on the screen during events and installation and monitoring the sound equipment.

To further support your base requirements, I would bring an enthusiastic and energetic approach to this position. I take direction well, but am also capable of working independently. I am very passionate about design, relational database and non-relational database and web programming.

Am able to execute projects from conception to completion.

Thank you for your time and consideration.

Sincerely,

0702686957

Barrack Owino Ochieng.
